

HamMUN 2016

09.12.15

My overall impression of the HamMUN conference was a very good one. It was my second MUN experience and again I got to know many different people from many different countries. As I was a member of the European Parliament I was able to gain an insight into the EU legislation process, which was in particular in regards to my law studies very interesting. However the highlights of the conference were - as usual - the socials in the evening. They gave us the possibility to get to know our fellow delegates even better. Moreover I felt quite good prepared for the conference. However I would prefer preparing the topics together with the whole delegation during our Monday sessions next time.

To put it in a nutshell the weekend was exhausting but real fun! I already look forward the next MUN!
